

Quick Facts About Cell Rejuvenator

Cell Rejuvenator is a formulation based upon MSM—a source of organic sulfur derived from nature.

Most people do not eat enough of the proper foods to ensure adequate sulfur stores in the body. Most foods today are overprocessed, heated, or just lack adequate amounts of sulfur. MSM supplementation easily provides this important mineral.

MSM allows better use of oxygen and nutrients by your cells and more efficient removal of waste products.

Because of the high levels of organic sulfur found in the skin, hair and nails, many people using MSM supplementation notice enhancement of the skin, hair and nails as well as other parts and functions of the body.

Athletes and active individuals find MSM very beneficial. MSM has been shown to improve post-workout recovery.

Cell Rejuvenator contains Lignisul™ MSM, which is guaranteed 99.9 percent pure and is an assurance of a high standard of quality necessary for optimal health benefits.

Lignisul MSM is extremely safe, non-toxic, and non-allergenic.

Cell Rejuvenator

Turn back time!

Leading nutritional researcher Peter Gillham has formulated a new product that creates good health on a cellular level—*Cell Rejuvenator*.

WHAT'S IN CELL REJUVENATOR?

Cell Rejuvenator is a precisely engineered formula designed to give cells the exact nutrients they need to rejuvenate quickly and in the best condition possible. The formulation contains MSM (methyl sulfonyl methane), vitamin C, bioflavonoids and zinc. While primarily used for its anti-aging benefits, *Cell Rejuvenator* has a great many applications.

In the early 1980s, researchers at the University of Oregon Medical School found that MSM is a natural sulfur compound present in all living things. It is actually one of the most prominent compounds in our bodies, just behind water and sodium. The research determined that the sulfur in MSM, called sulfonyl, is as safe and as important as vitamin C in our diets.

WHAT THIS MEANS TO YOU

MSM is an important nutrient and a key ingredient in *Cell Rejuvenator*. It is needed by the body for healthy connective tissue and joint function, proper enzyme activity and hormone balance, along with correct functioning of the immune system.

Just how important is it? Approximately half of the body's total sulfur is concentrated in the muscles, skin and bones. It is also present in keratin, the tough substance in the skin, nails and hair. Sulfur is necessary for making collagen, the primary constituent of cartilage and connective tissue.

Supplementation with MSM has been found to improve many health situations, such as allergies, asthma, emphysema, lung dysfunction, arthritis, headaches, skin difficulties, stomach and digestive tract problems, circulation and cell absorption.

MSM is non-allergenic and has no undesirable pharmacological effects. You cannot overdose with MSM—the body will use what it needs and flush out the rest without harm. **Because it is also a free radical and foreign protein scavenger, MSM cleans the bloodstream, so allergies to foods or pollens can be eliminated—sometimes in just a few days.**

BEAUTY SECRET

We have all heard that with age the skin loses its elasticity, but do you know why? When the body replaces old skin cells, if there is a deficiency of MSM, the new cells are stiff and contribute to wrinkling. MSM supplementation helps the body replace bad cells with good, healthy, elastic cells.

IT'S IN THE FORMULATION

Peter Gillham's *Cell Rejuvenator* is a complete formulation, not just another MSM product. First, it includes vitamin C—the perfect companion to MSM. While MSM helps release toxins, vitamin C neutralizes them. While MSM helps to speed new cell formation, vitamin C is one of the primary nutrients the body looks for in making new cells.

Bioflavonoids are another part of the *Cell Rejuvenator* formula. They greatly enhance the absorption of vitamin C. Along with this, bioflavonoids help promote a strong immune system, improve circulation, and help maintain healthy cholesterol levels.

Cell Rejuvenator also includes zinc—one of nature's "super minerals." Zinc is responsible

for accelerating healing and for the formation of DNA in our tissues. DNA is essentially the blueprint the body follows when forming and renewing itself, piece by piece, starting with each new cell.

EASY TO USE

The ingredients in *Cell Rejuvenator* are mixed in exact amounts to achieve what we feel is the best recipe for cell rejuvenation.

Cell Rejuvenator is available in convenient capsules and in powdered form. If you prefer to take capsules, we recommend 4 capsules a day (2,400 mg). If you want to take a higher therapeutic dosage, you may prefer the powdered form, which easily mixes with your favorite juice. *Cell Rejuvenator's* vital ingredient, MSM, is safe and non-toxic. Some people will see results in days, while it can take weeks for others. The key to success is to be consistent in taking *Cell Rejuvenator*.

A constant supply of the ingredients in *Cell Rejuvenator* is required to build the healthy cells needed for proper organ functioning and for maintaining healthy skin, hair and nails.

When you stop to think about the fact that our bodies produce new cells 24 hours a day, you get some idea of how vital *Cell Rejuvenator* is.
