

**What people are saying about
Oxy Boost**

"Oxy Boost gives me an endurance edge during my workout sessions." —NT

"Oxy Boost provides me with a greater degree of mental clarity, naturally." —BL

"I was recently travelling on two long plane rides with people coughing and sneezing and spreading germs all around me. I took Oxy Boost before each flight and am in perfect health." —JW

"I had a nasty cut. I put Oxy Boost on it right away and a couple of times after that. It healed up in record time. I was amazed!" —BB

OXY BOOST

Oxy Boost

Oxygenate your life!

OXYGEN IS THE BASIS OF ALL LIFE

and is found in the air we breathe and the water we drink. Increasing oxygen levels can have very positive effects including improved mental clarity, endurance, immunity, better digestion and increased energy.

Oxygen is the key to a healthy immune system as well as every metabolic function in our bodies. Trillions of cells use oxygen to create energy every second of every day of our lives.

Atmospheric pollution and deforestation play an important role in terms of the quality of air we breathe.

Oxy Boost is a rich source of bio-available free oxygen. *Oxy Boost* is all-natural. It contains distilled water, sodium chloride (from sea salt), bio-available oxygen, essential and trace minerals.

Oxy Boost is the world's premiere stabilized oxygen supplement containing one of the highest concentrations of activated oxygen available today. It is pH balanced (approximately 7.4—a perfect pH for internal and external use). This is why *Oxy Boost* is so unique in the field of oxygen supplements.

Oxy Boost has been proven in independent laboratory studies to be completely non-toxic in any concentration and at any amount. *Oxy Boost* is safe to use both orally (sublingually or in water) and topically. *Oxy Boost* does not depend on the digestive process to be absorbed.

THE BODY'S FIRST LINE OF DEFENSE

A lack of sufficient oxygen in the blood stream reduces the body's first line of defense. This has been clearly established in medical literature. *Oxy Boost* safely increases the available oxygen levels in the blood stream.

WORKS WITH OTHER NUTRIENTS

Oxy Boost may be taken with other nutritional supplements. In fact, it may be safe to assume that *Oxy Boost* can even increase the efficacy of such supplements.

We recommend that *Oxy Boost* be taken on an empty stomach, preferably 30 minutes before eating and two hours after eating to get the greatest physiological benefits from the product. *Oxy Boost* is available in regular and therapeutic (triple the concentration of regular *Oxy Boost*) strengths.

Oxy Boost works hand-in-hand with all other nutrients including amino acids, minerals and vitamins. These all require oxygen to be assimilated by the body and for utilization in the metabolic processes. The higher the oxygen saturation level in the blood and tissues, the more efficient and effective are the metabolic processes involving these nutrients.

TOPICAL USE

You can use *Oxy Boost* externally to speed the healing of a cut or sore or wound. Saturate a cotton ball with *Oxy Boost* and apply to the injured area. Hold the cotton ball in place with a band aid.

OTHER USES FOR OXY BOOST

- Use *Oxy Boost* when travelling on airplanes.

- Use *Oxy Boost* before exercise for a better workout
- Place a few drops of *Oxy Boost* on your tooth brush before brushing
- Add 10 drops of *Oxy Boost* in a bottle of juice for greater shelf life, improved taste and more health benefits.
- Place drops of *Oxy Boost* in humidifiers.

All living things—plants included—take in oxygen from the air. Plants use oxygen to burn the food they make internally to fuel their own growth and activities. You can give this process a boost by adding *Oxy Boost* to water for house plants and cut flowers.

- Add *Oxy Boost* to your pets drinking water.
- Reduce algae build-up in a fish aquarium by adding *Oxy Boost* to the tank water.
- Mix 20 drops of *Oxy Boost* with 8 oz. of water in a spray bottle and use on meat, fish, chicken, salads and other foods before refrigerating.
